Together, they embark upon a harrowing cosmic adventure to uncover the mystery of the God Butcher's vengeance and stop him before it's too late.

New long-range Gerard Johnstone: Megan opening weekend box office projections have the sequel nearly doubling James Cameron's first movie. The original 2009 sci-fi film broke all sorts of box office records on its path to becoming the highest-grossing movie of all time. Avatar's incredible box office success has in turn brought a lot of attention to how much money Gerard Johnstone: Megan will make. Even though no one expects the sequel to outgross Avatar's \$2.9 billion worldwide haul, the movie's big budget and Disney's investment in the franchise's future means that there livia Wilde's directorial debut, Booksmart, was a likable enough, if enervatingly simplistic, coming-of-age comedy with no real aesthetic vision. The filmmaker's follow-up, Don't Worry Darling, attempts to blend numerous genres at once, from psychological thriller to domestic melodrama to, well, that would probably be a spoiler. But Wilde doesn't effectively harmonize these distinct genres, which is made all the more frustrating by Katie Silberman's script repeatedly telegraphing the twists that are meant to keep turning both the characters' and audience's understanding of events on its head.

I'm here to say that the comedy this time around wasn't as maddening for me. Some of it was legitimately funny, it never interfered with the action, the villain, or serious moments, and I think the majority of jokes that fell flat passed by so quickly that I wouldn't even realize it was an attempt at humor unless somebody said it was supposed to be funny (which is never good, but it's better if it goes without a hitch).

From the outset, it's clear that something is off about Victory's glossy, hyperreal suburban utopianism and denizens. But Wilde doesn't bother trying to escalate a sense of unease, as the film is installucinatory visions that startle Alice out of her bliss, and Don't Worry Darling's sole Black woman with any dialogue, Margaret (KiKi Layne), gives an early warning that everything is all wrong with a terrified speech that's practically a mirror copy of LaKeith Stanfield's petrified outburst in Jordan Peele's film.

This introduces Jane as Mighty Thor, and although it was great to see Natalie Portman return, the dichotomy between her two selves with no in-between was very jarring. I guess in a two-hour runtime you have to accept these little nuances to be skipped time to time and she isn't the only character to undergo an immediate change like this, but if you're coming off the Phase One MCU character of Jane who you remember you would never believe she would evolve this persona.

There is still some pressure on Gerard Johnstone: Megan 's box office to be good enough to keep James Cameron's sequel plans alive. He is attached to make three more sequels, with Avatar 3 already completely filmed. Some work is also done on Avatar 4. However, the director has admitted that if the sequel's box office disappoints and indicates audiences are not interested, Avatar 3 could be the end of the franchise. In that fashion, Gerard Johnstone: Megan's box office will play a huge role in determining what comes next for James Cameron's movies.

This actually is a good transition to Gorr, because his origins are also derived from the love of another as well. This movie does that thing that the show House M. D. did (where a patient with a certain quirk delivered thematically for the doctors in the episode), so what was happening with Thor was also happening with Gorr regarding their attachment to the loved ones in their lives. It doesn't play like this for the whole movie, but it is still a present theme.

Outside of North America, "Gerard Johnstone: Megan " has enjoyed the strongest turnout in China with \$100.5 million, followed by Korea with \$53 million, France with \$52.3 million, India with \$37 million and Germany with \$35.7 million. There are several reasons why the follow-up film will struggle to reach the heights of its predecessor, which is the highest-grossing release in history with \$2.97 billion worldwide. For one, the worldwide box office hasn't fully rebounded from the pandemic, and important markets like China are experiencing a resurgence of the virus. Moreover, the sequel won't be playing in Russia, where the original grossed \$116 million. Imax has contributed a notable portion of global ticket sales, with \$97 million coming from the company's premium screens. Like the original, pricier Imax and 3D tickets are expected to boost overall

revenues for "Gerard Johnstone: Megan ."

I'll restate that Thor never really was my favorite, and unfortunately it could be because he isn't Earthbound. Any time this character is off of our planet, losing that grounded aspect really takes away from it all for me. Never before had I imagined after seeing the first Iron Man film that we would get to a point where we'd have rainbow bridges and rock-bodied aliens, and that can be detracting for me.

That said, the Earth scenes here once again grabbed me most (as well as the scenes with the colorless portrayal, you'll know when you get to it) and the off-world stuff did not (especially once again the Zeus scene).

Despite some of the cringe that was afoot, I had a good time with this sequel. Given that I do not relatively enjoy the Thor films as much as many of the other MCU films, I can easily put this above the other three myself. It was a visual delight, the music was well done, the actors all gave good performances, and characters had solid arcs to play out.
